MedMe School Vaccines: Requirements and Use Cases (v2)

Source: Claude Doc "MedMe School Vaccines Requirements and Use Cases v2", dated 2026-10-20. Copied into the repo as a governing reference. Amendments made after this date are in `updates-since-v2.md`. Items marked (A) depend on answers from Nick or from pharmacists.

Core features

1. Create and manage parent and child profiles, including parent consent for a minor
2. Let parents open the app from a school slip QR code, a school email or a pharmacy ad, and sign in securely
3. Pull a child's vaccine record from the state registry, or let the parent enter or upload it
4. a. Registry access depends on what MedMe or the pharmacy can query (A)
5. b. Photos and typed records are reviewed by the pharmacist, not trusted automatically
6. Compare the record to the school's requirement for the child's state and grade, and list missing doses with the earliest allowed date
7. Let pharmacies publish which vaccines and ages they give, plus capacity, and let parents see matching nearby pharmacies
8. Show the cost ($0 or a price) before booking, let parents pick a slot, and send reminders
9. Give pharmacists a pre-filled appointment view and record the dose once
10. Report doses to the state registry and produce a pharmacist-signed proof the parent can send to the school
11. a. Think registry reporting, with a manual export as the fallback (A)
12. Let schools create a drive with a QR code and slots, notify families, and see aggregate completion
13. Give MedMe staff a campaign view of scans, bookings, completed and reported shots, and let admins maintain the state rules table

Core requirements

ID	Description	User action / trigger	Acceptance criteria (Given, when, then)	Non-functional requirements
REQ-001	Profile and consent creation	Parent submits child details and consent.	Given a parent on the app, when they submit a child's name, birth date, grade and school and give consent, then the system must create a profile linked to that parent.	Collect the minimum data. Encrypt at rest. Follow health privacy law (confirm with MedMe).
REQ-002	Entry and authentication	Parent scans a QR code or opens a link.	Given a scanned school QR code, when the page loads, then the system must show the school and state and let the parent continue or sign in.	Page loads within 3 seconds on a phone. Session times out after 30 minutes idle.

ID	Description	User action / trigger	Acceptance criteria (Given, when, then)	Non-functional requirements
REQ-003	Records retrieval	Parent asks for the child's record.	Given a child profile, when the parent asks for the record, then the system must pull it from the registry or offer manual entry (A).	Show the source and date of the record. Handle registry downtime without blocking the parent.
REQ-004	Missing-shot check	Check runs once a record is loaded.	Given a record and the state rule for the grade, when the check runs, then the system must list missing doses and earliest allowed dates.	Show the rule version and source. Return results within 5 seconds.
REQ-005	Pharmacy matching	Parent selects vaccines and searches.	Given selected vaccines and a location, when the parent searches, then only pharmacies that accept those vaccines and that age must appear.	Pharmacy setting changes appear within 1 minute.
REQ-006	Cost check and booking	Parent picks a pharmacy and a slot.	Given an eligible pharmacy and insurance details, when the parent continues, then the system must show $0 or a price before confirming, and schedule a reminder (A).	Never confirm a booking without showing the cost. Reminders by text or email.
REQ-007	Visit documentation	Pharmacist opens the appointment.	Given a booked appointment, when the pharmacist records the dose, then vaccine, lot, site and time must be stored once.	No re-entry. Works on a counter tablet.
REQ-008	Registry report and proof	Pharmacist signs the record.	Given a recorded dose, when the pharmacist signs, then the system must report it to the registry or flag it for manual entry, and produce a proof (A).	Show report status. Proof available as a PDF and a link.
REQ-009	School drives and notices	Nurse creates a drive.	Given a school and a partner pharmacy, when the nurse creates a drive, then the system must produce a QR code and a slot list.	Show aggregate counts only. No child names unless the parent shares proof.
REQ-010	Analytics and rules administration	Staff opens the campaign view or edits a rule.	Given a campaign, when staff open it, then they must see scans, profiles, bookings, completed and reported counts. Given a rule change, when the admin saves, then it must apply without a code change.	Audit log of rule changes. CSV export of funnel data.

Core use cases by category (first table in the doc, numbered UC-001 to UC-033)

Requirement category	Use case ID & title	Purpose	Requirements
Family Profile & Entry (REQ-001, REQ-002)	UC-001: Create Parent Account	Parent creates an account.	Requires code verification.
	UC-002: Add Child Profile	Parent enters child details.	Collects only what the check needs.
	UC-003: Give Parent Consent	Parent consents to the vaccination.	Must meet the state consent rule (A).
	UC-004: Open from QR or Link	Parent lands on the right school and state.	Link carries the school ID.
	UC-005: Sign In	Returning parent signs in.	Passwordless code.
	UC-006: Update Profile	Parent edits child or contact details.	Edits re-run the check.

Requirement category	Use case ID & title	Purpose	Requirements
Records & Missing Shots (REQ-003, REQ-004)	UC-007: Pull Registry Record	System fetches the child's record.	Depends on registry access (A).
	UC-008: Enter Record Manually	Parent types doses.	Show the school requirement beside each field.
	UC-009: Upload Record Photo	Parent uploads a paper record.	Pharmacist reviews the image.
	UC-010: Run Missing-Shot Check	System lists missing doses.	Uses the state rules table.
	UC-011: Show Earliest Dates	System shows first allowed dates.	Uses the interval table.
	UC-012: Select Vaccines to Book	Parent chooses vaccines.	Nothing preselected.
Pharmacy & Booking (REQ-005, REQ-006)	UC-013: Publish Pharmacy Settings	Owner lists accepted vaccines and ages.	Warns on state limits.
	UC-014: Search Eligible Pharmacies	Parent finds matching pharmacies.	Filters by vaccine, age and location.
	UC-015: Show Fallback Options	Parent gets other routes.	Directory by state.
	UC-016: Check Insurance Cost	Parent sees $0 or a price.	Cost shown before confirming (A).
	UC-017: Choose Slot	Parent books a time.	Follows pharmacy capacity.
	UC-018: Send Reminders	Parent is reminded before the visit.	Text or email.
	UC-019: Reschedule or Cancel	Parent changes the booking.	Frees the slot.
Visit & Proof (REQ-007, REQ-008)	UC-020: View Pre-filled Appointment	Pharmacist sees intake.	No repeated questions.
	UC-021: Verify Consent and Eligibility	Pharmacist confirms at the counter.	Shows the state rule.
	UC-022: Decline or Refer	Pharmacist stops with a reason.	Reason is stored.
	UC-023: Record Dose	Pharmacist records once.	Feeds the report and proof.
	UC-024: Report to Registry	Dose goes to the registry.	Status shown (A).
	UC-025: Generate Proof	Pharmacist-signed record is produced.	PDF and link.
	UC-026: Share Proof with School	Parent sends proof.	Link or PDF.
	UC-027: Send Next-Dose Reminder	Parent is reminded of the next dose.	Uses the interval table.
Schools & Administration (REQ-009, REQ-010)	UC-028: Create School Drive	Nurse sets a drive.	Creates a QR code and slots.
	UC-029: Accept Drive	Partner pharmacy confirms.	Confirms capacity.
	UC-030: Notify Families	Nurse shares the link.	Message template.
	UC-031: View Drive Completion	Nurse sees aggregate counts.	No child names unless shared.

Requirement category	Use case ID & title	Purpose	Requirements
	UC-032: View Campaign Funnel	MedMe staff sees the funnel.	Counts by store and school.
	UC-033: Maintain State Rules	Admin edits rules.	Audit log.

The second table below (v2) renumbers these as UC-Profile-01 and so on. Mapping: UC-001..003 to UC-Profile-01..03; UC-004..006 to UC-Entry-01 (QR or link), UC-Entry-02 (sign in), UC-Entry-03 (manage session); UC-007..009 to UC-Record-01..03; UC-010..012 to UC-Check-01..03; UC-013..015 to UC-Match-01..03; UC-016..019 to UC-Book-01..04; UC-020..023 to UC-Visit-01..04; UC-024..027 to UC-Proof-01..04; UC-028..031 to UC-School-01..04; UC-032..033 to UC-Admin-01..02.

Core use cases by category (v2)

Requirement	Use case ID and title	Purpose	Requirements
REQ-001 Profile and Consent	UC-Profile-01 Create Parent Account	Parent creates an account.	Requires code verification.
	UC-Profile-02 Add Child Profile	Parent enters child details.	Collects only what the check needs.
	UC-Profile-03 Record Parent Consent	Parent consents to the vaccination.	Must meet the state consent rule (A).
REQ-002 Entry and Authentication	UC-Entry-01 Open from QR or Link	Parent lands on the right school and state.	Link carries the school ID.
	UC-Entry-02 Sign In	Returning parent signs in.	Passwordless code.
	UC-Entry-03 Manage Session	Parent edits details; session ends when idle.	30-minute idle timeout. Edits re-run the check.
REQ-003 Records Retrieval	UC-Record-01 Pull Registry Record	System fetches the child's record.	Depends on registry access (A).
	UC-Record-02 Enter Record Manually	Parent types doses.	Show the requirement beside each field.
	UC-Record-03 Upload Record Photo	Parent uploads a paper record.	Pharmacist reviews the image.
REQ-004 Missing-Shot Check	UC-Check-01 Run Missing-Shot Check	System lists missing doses.	Uses the state rules table.
	UC-Check-02 Show Earliest Dates	System shows first allowed dates.	Uses the interval table.
	UC-Check-03 Select Vaccines to Book	Parent chooses vaccines.	Nothing preselected.
REQ-005 Pharmacy Matching	UC-Match-01 Publish Accepted Vaccines	Owner lists accepted vaccines and ages.	Warns on state limits.
	UC-Match-02 Search Eligible Pharmacies	Parent finds matching pharmacies.	Filters by vaccine, age and location.
	UC-Match-03 Show Fallback Options	Parent gets other routes.	Directory by state.
REQ-006 Cost Check and Booking	UC-Book-01 Check Insurance and Cost	Parent sees $0 or a price.	Cost shown before confirming (A).

Requirement	Use case ID and title	Purpose	Requirements
	UC-Book-02 Choose Slot	Parent books a time.	Follows pharmacy capacity.
	UC-Book-03 Send Reminders	Parent is reminded.	Text or email.
	UC-Book-04 Reschedule or Cancel	Parent changes the booking.	Frees the slot.
REQ-007 Visit Documentation	UC-Visit-01 View Pre-filled Appointment	Pharmacist sees intake.	No repeated questions.
	UC-Visit-02 Verify Consent and Eligibility	Pharmacist confirms at the counter.	Shows the state rule.
	UC-Visit-03 Decline or Refer	Pharmacist stops with a reason.	Reason is stored.
	UC-Visit-04 Record Dose	Pharmacist records once.	Feeds the report and proof.
REQ-008 Registry Report and Proof	UC-Proof-01 Report to Registry	Dose goes to the registry.	Status shown (A).
	UC-Proof-02 Generate Proof	Pharmacist-signed record is produced.	PDF and link.
	UC-Proof-03 Share Proof with School	Parent sends proof.	Link or PDF.
	UC-Proof-04 Send Next-Dose Reminder	Parent is reminded of the next dose.	Uses the interval table.
REQ-009 School Drives and Notices	UC-School-01 Create School Drive	Nurse sets a drive.	Creates a QR code and slots.
	UC-School-02 Accept Drive	Partner pharmacy confirms.	Confirms capacity.
	UC-School-03 Notify Families	Nurse shares the link.	Message template.
	UC-School-04 View Drive Completion	Nurse sees aggregate counts.	No child names unless shared.
REQ-010 Analytics and Administration	UC-Admin-01 View Campaign Funnel	MedMe staff sees the funnel.	Counts by store and school.
	UC-Admin-02 Maintain State Rules	Admin edits rules.	Audit log.
